

An early draft of the [Ten Theses on Non-Democratic Electronics: Organized Networks Updated](#) that Ned Rossiter and I wrote has been circulating on the Net. Please delete it, forget it, the text got out a bit too soon. The 0.1 draft was first posted on an internal email list that is used to prepare for a (closed) meeting in Berlin on Networked Politics (neither Ned nor me will be able to attend it). A [wiki](#) has been made for this meeting. The first reader you can [download here](#). The gathering is co-organized by TNI in Amsterdam and takes place at the Rose Luxemburg Foundation in the period of the G8 protests in Berlin and Heiligendamm.
