## MoneyLab Reader #2 Crowdfunding Campaign

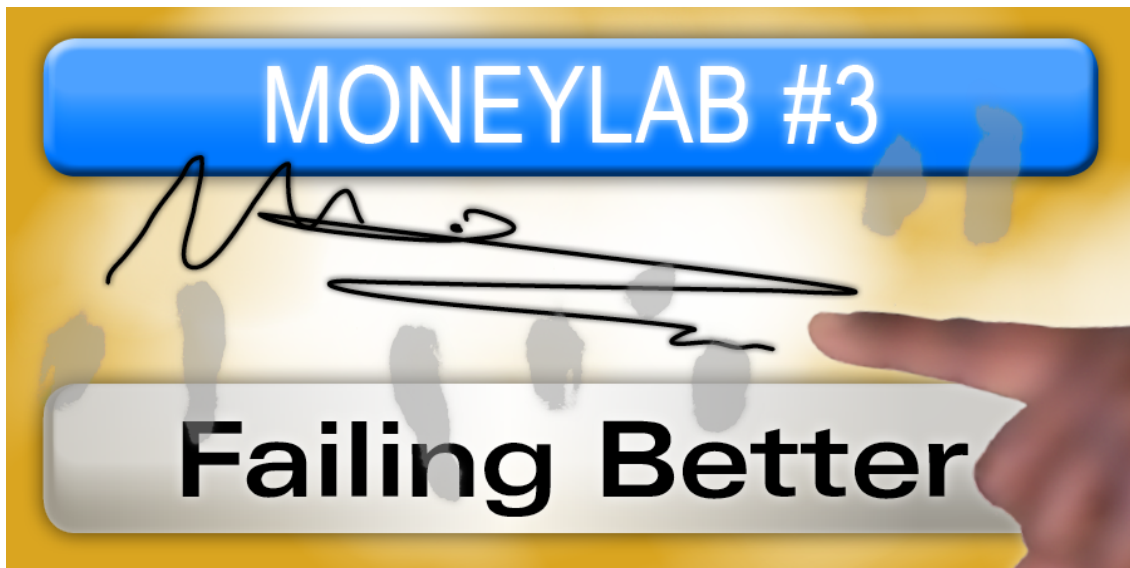

**One week left to donate!**

Three weeks after the launch of the [first INC crowdfunding campaign](#), we are happy to announce that we collected €1384, which is a very encouraging sign.

However, the campaign is not over yet and, in order to reach our goal, we need your support: we aim to raise €5000 before 22 December 2016 in order to make the next MoneyLab Reader a printed reality. Read more about the campaign [here](#).

You can get involved by donating whatever you can spare on [our website](#) or through our [Eventbrite page](#).

Help spread the word! #MoneyLabReader

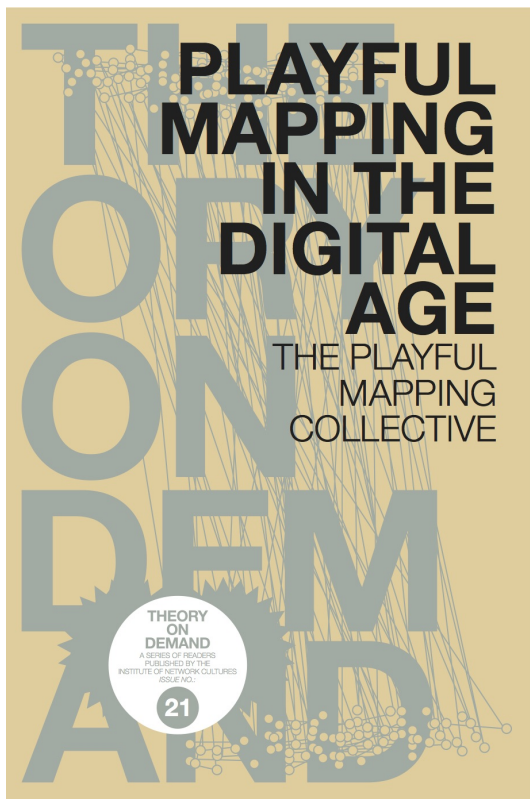

## **MoneyLab #3: all reports, photos & most videos are now online**

[MoneyLab #3 Failing Better](#) took place on 1 and 2 December 2016 at Pakhuis de Zwijger & Mezrab in Amsterdam.

With over 40 (inter)national speakers and more than 200 attendees, this third edition of MoneyLab was a great success.

Were you not able to attend, or would you like to remember a great quote or an interesting discussion, please check out our documentation:

- Find pictures of the whole event [here](#) and the highlights [here](#).
- All videos will be added [here](#). The first ones are already up.

## Theory on demand #21: Playful Mapping in the Digital Age

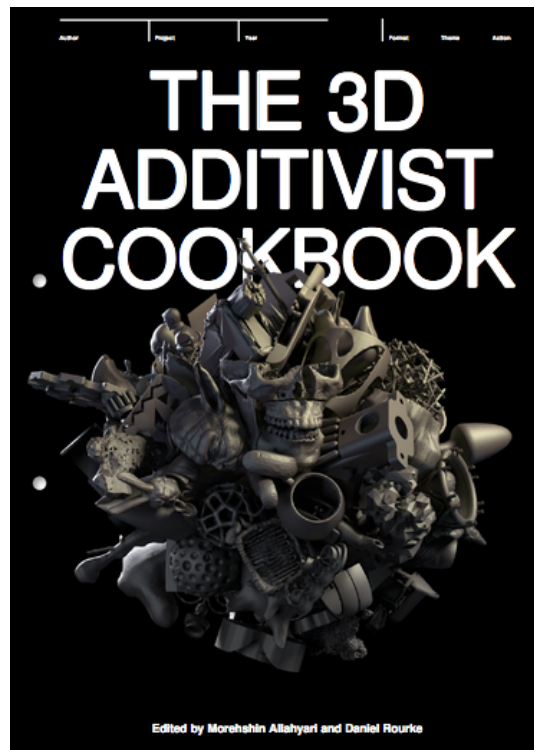

### The playful mapping collective

From Mah-Jong, to the introduction of Prussian war-games, through to the emergence of location-based play: maps and play share a long and diverse history.

The authors show how mapping and playing unfold in the digital age, when the relations between these apparently separate tropes are increasingly woven together.

Playing and mapping can be liberating, dangerous, subversive and performative at once!

## Out now: 3D Additivist Cookbook

The 3D Additivist Cookbook, devised and edited by Morehshin Allahyari and Daniel Rourke, is a compendium of imaginative, provocative works from over 100 world-leading artists, activists and theorists.

The 3D Additivist Cookbook contains 3D .obj and .stl files, critical texts, templates, recipes, (im)practical designs and methodologies for living in this most contradictory of times.

This extraordinary publication questions whether it's possible to change the world without also changing ourselves, and what the implications are of taking a position.
